

Living in the 21st Century World: Perspective on Climate Change, Pandemic, and Digital Transformation

Chapter 12 - The Leadership Question of the 21st Century—A Futuristic View of Africa - Anthony Obi Ogbo

This chapter summarizes the fundamental concerns faced by Africa in the 21st century and explores the potential creation of strategies for governance transformation. The structure of governance should facilitate the effective delivery of public service, through a systematic approach that engages with various phases of civil society, community action, social capital, charity, and efforts to combat corruption. These concepts reflect the World Bank's six dimensions of governance: voice and accountability, political stability and absence of violence/terrorism, government effectiveness, regulatory quality, rule of law, and control of corruption (Brown et al., 2018).
