

**Living in the 21st Century World: Perspective on Climate Change, Pandemic, and Digital Transformation**

**Chapter 4 - Industrial Revolution, Industrialization, and Impacts on Human Environment: Imperativeness of Environmental Education**

**Author(s) - <sup>1</sup>Tolu O. Isele, <sup>2</sup>Bimpe E. Alabi & <sup>3</sup>Kofo A. Aderogba**

- College of Specialized & Professional Education, Tai Solarin University of Education - Ijagun, Ogun State, Nigeria.

The impacts of man on the environment over the years has been humongous. As a result, natural environment is limited, and it will keep on diminishing. The chapter will provide an overview of industrial revolutions; give an insight into what is 'natural' environment, and how it has been interfered with directly and inadvertently by the processes of industrialization over space and time. It will dwell on the consequences of man-environment interaction; and outline the position of adult education towards sustainable environment. Page 44 – 64
