

Living in the 21st Century World: Perspective on Climate Change, Pandemic, and Digital Transformation

Chapter 9 - Managing Digital Technology and Research Communication for Sustainable Systems - Brendan James Moore, Syed Adeel Ahmed, and Ashraf Esmail

The context for what digitization can do for payors and providers in the healthcare setting is discussed. Among these are that *Digitization eases communication among patients and healthcare providers and patient outcomes in medical settings, digital technology can lower cost of a variety of operations, and that improvements in digitization help create sustainable environments for file management information governance.* The first, however, is how digitization and analytics use can be used to ease communication of patient outcomes in medical settings. 125 – 140
